Protector from Headache in Meditation Currant Bun

A stylised currant bun with raisins on it

Final protector from headache.

In time of Honours, Masters or PhD (when praying for many As), pretend there is a currant bun that can be fingered instead of having a headache. One should start pretending this each day, followed by stopping pretending that it is there from the previous day.

Theory

Currant Bun Protector from Headache in Meditation

- I mean that there is a mistake that I don't mean that there is a rear void that will have a rod inserted instead of having people finger my head and neck muscles, causing me to have a headache when meditating, so that a headache will be prevented.
- Course: breason out 10 Medicine As, then put currant bun breasonings on system, where the As go with money spent on them and treat by explaining the currant bun meditation (or just repeating the sutra "Currant Bun").
- The currant bun is in fact a huge spiritual air-filled balloon above one's head containing black squares of headache causing blueberry jam on spatulas to be attracted to instead of causing a headache. The skill is to meditate and spiritually transcend the black squares, until they disappear, leaving a clear head.
- Skills: Postpone headache until meditation and meditate at sunset, just before bed. Meditation is necessary for health reasons. No headache is experienced when one meditates in bed before going to sleep.
